MUSHARRAF MOHAMED

Software Engineering Intern | Python, FastAPI, React

Dehiwala, Colombo, Sri Lanka | +94 75 736 6994 | mohammedmsm2002@gmail.com | GitHub | LinkedIn

PROFESSIONAL SUMMARY

CS & Software Engineering undergrad experienced in building Python/FastAPI backends, React apps, PostgreSQL, and RAG applications. Built an AI legal research assistant using document retrieval, embeddings, Pinecone, and Gemini, and an audit workflow with Supabase, Vercel, and GitHub Actions. Seeking a Software Engineering internship or junior role.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, PHP, SQL

Backend & AI: FastAPI, REST API design, RAG architecture, Pinecone, Hugging Face, Prompt Engineering

Databases & Cloud: Firebase (Auth, Firestore), Supabase (PostgreSQL, Auth, Storage, Edge Functions), Deno, Vercel

Frontend: React, HTML5, CSS3, Progressive Web Apps (PWA)

Tools: Git/GitHub, Figma

PROJECT EXPERIENCE

LankaTaxMind — AI-Powered Legal Research Assistant | *Freelance Project — ANM (anm.lk) | 2026*

- Individual developer responsible for the retrieval pipeline, API integration, and web application workflow.
- Indexed 5,600+ document chunks across 11 Sri Lankan tax law sources by building a full RAG pipeline (extraction → chunking → embeddings) with FastAPI, Pinecone, and Google Gemini.

Tech: Python, FastAPI, React, Pinecone, Google Gemini API, Firebase, Hugging Face, SHAP

ANM Audit Tool - *Freelance Full-Stack Developer — ANM (anm.lk), 2025 – Present*

- Replaced manual document handoffs with an end-to-end audit workflow (upload → review → approve/reject), securing access across three tiers with row-level security.
- Cut manual support overhead and improved release speed by shipping OTP-based password reset and GitHub CI/CD auto-deployment to Vercel.

Tech: JavaScript, TypeScript, Supabase, PostgreSQL, Deno Edge Functions, Vercel, GitHub [Github link - Click Here]

Workshop Registration Service — Full-Stack Web Application | Technical Challenge Project | 2026

- Developed a role-based workshop registration system (FastAPI, React) with an atomic capacity check; a 30-request concurrent test filled a 5-seat workshop with exactly 5, and full history is kept.

Tech: Python, FastAPI, SQLAlchemy, SQLite, JWT, React, Vite, Vercel, Render [Github link - Click Here]

Inventory Management System | *CRUD Application*

- Developed a **Java-based inventory management system** with full **CRUD functionality**, user authentication, database management, and real-time stock operations using **Java, PHP, and MySQL**.

EDUCATION

BSc (Hons) Computer Science and Software Engineering — SLIIT City Uni

2024 – Present

Artificial Intelligence — SLIIT City Uni | March 2026 – June 2026

• Skilled in ML, NLP, GenAI, RAG, and AI deployment; built **LankaTaxMind**, a full-stack RAG AI application..

LANGUAGES

English (Fluent) | Tamil (Fluent) | Sinhala (Basic)
